DETAILED ACTION

Election/Restrictions

The applicant elected group I, which includes 1-10 and 16-20. However, upon further consideration another election requirement is deemed necessary among the elected group.

This application contains claims directed to the following patentably distinct species:

Claim 1 includes a microphone and digital processor which includes **an inhibitor** with varying function in respect to the dependency of the following:

Species A – claim 2 is drawn to the inhibitor including two representations

Species B – claim 3 is drawn to the inhibitor including a multiple of time-circuits

Species C – claim 4 is drawn to the inhibitor including a detector having a Hilbert
Filter

Species D – claim 5 is drawn to the inhibitor including an estimator

Claim 6 includes sampling, **smoothing** and adjusting, therein, in which smoothing includes varying functionality in respect to the dependency of the following:

Species A – claims 7-8 is drawn to smoothing including creating two
representations of the input signal

Species B – claims 9-10 is drawn to smoothing including using a Hilbert filter

Claims 16 –17, which includes a preamplifier, a sampler, a detector, an adjuster, and a filter (claim 17), wherein the **detector** includes varying functionality in respect to the dependency of the following:

Species A – claim 18 is drawn to the detector including a Hilbert filter

Subspecies – claims 19 and 20 are drawn to the detector squaring each signal of the Hilbert filter

The species are independent or distinct because the specific components and their different functions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

A telephone call was made to Timothy Bianchi on 4/17-06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
